Library of Congress Catalog Card Number 67-12454

Printed in the United States of America

CONTENTS AND ARRANGEMENT

Scope

This *Dictionary Catalog* contains, in one alphabetic sequence, author, title, and subject entries for monographs, serials, and analytics as cataloged for the main collection of the National Agricultural Library and for its Bee Culture and Beltsville Branches. Descriptive information, including notes, has been reproduced as it appears in the card catalog. Library call numbers are also given. Tracings, however, have been omitted. In the card catalog, many tracings appear on the backs of cards; in some cases, changes in tracings have been made only on the main entry card. To have included incomplete or incorrect information in the published work would have been more misleading than helpful.

Information cards, such as those describing the history of a corporate body or geographic area, have been reproduced from the card catalog. Also included in the printed volumes are author and subject cross-references.

At the end of the *Dictionary Catalog*, there appears, in a separate alphabetical arrangement, a list of translations of articles in the Library collection. This file consists of main entry only under author or, if the article has no author, under its title. Translations of articles are not classified. They are identified by a consecutively assigned number shown in call number position.

Policies

The changes in policy and practice made throughout the years of its development are reflected in the *Dictionary Catalog*. The following basic tools were in use when this catalog was discontinued in December, 1965. They had been modified, interpreted, and supplemented in various ways to meet the changing needs of the Library:

A.L.A. Cataloging Rules for Author and Title Entries. Second Edition, 1949.

Rules for Descriptive Cataloging in the Library of Congress, 1949.

Scheme of Classification for the United States Department of Agriculture Library. Edition 5, 1940.

U. S. National Agricultural Library. Subject Heading List. Preliminary Edition, 1963.

A.L.A. Rules for Filing Catalog Cards, 1942.

Editing

The publisher provided an editorial staff to review the card catalog before publication. Working from guidelines provided by the Library, this staff concentrated on withdrawing obsolete cards from the catalog and checking its filing arrangement.

More than 1,500,000 cards were examined. With limited time to perform such a large task, complete accuracy cannot be assured. Only the most glaring instances of error or illegibility warranted correcting or retyping cards. No attempt could be made to recatalog old entries to bring them in line with current practices.

Filing Arrangement

Catalog Entries

Within any given part of the catalog, the page display of entries will make their arrangement obvious. However, a statement of some of the Library's basic filing practices will facilitate use of the catalog as a whole.

1. General order of entries is:

Author
Periodical title
Periodical title as author
Subject
Title

Single letters, whether abbreviations or initialisms, file at the beginning of that part of the alphabet.

History cards precede entries of the organization described. "See also" references follow the related entries.

Entries for editions of works are filed with the earliest first.

2. Government entries for departments, bureaus, offices, etc., in the more familiar languages are generally arranged under the jurisdiction by the key word following the preposition. For example:

U. S. Bureau of *Agricultural Economics*.

U. S. Dept. of *Agriculture*.

U. S. Bureau of the *Census*.

U. S. Office of *Foreign Agricultural Relations*. Those in the less familiar languages are arranged word by word.

Contents and Arrangement

3. Subdivisions of corporate bodies are also generally filed on this key-word principle. There are known inconsistencies in the catalog, though. Notable examples are entries for bodies whose names begin with the following terms and include a prepositional phrase: Service, College, Commission, Committee, Conference, Institute, and School.
4. Subject entries are subarranged by author. Generally, the filing order is as follows:
 - Subject without subdivision
 - Subject with geographic subdivision
 - Subject with subject subdivision and inverted subject headings interfiled, e.g.,
 - Milk. Acidity.
 - Milk. Care and handling.
 - Milk, Certified.

Milk, Citric acid in.

Milk. Composition.

Subject followed by qualifying term in parentheses.

Translations of Articles

The author's name is listed in the form in which it appears on the translation. Entries are interfiled whether or not forenames are spelled out and whether or not a joint author appears in the heading.

Inquiries

Cataloging and classification questions about the entries in the *Dictionary Catalog* should be addressed to the Chief, Division of Catalog and Records, National Agricultural Library, U. S. Department of Agriculture, Washington, D. C. 20250.

"The experiments which form the basis of this work were carried out during Prof. Wilfarth's lifetime. His death occurring suddenly on 27th Nov. 1904 precluded the preparation and publication of the work from being supervised by the deceased himself. Therefore Dr. G. v. illus. 25-26".

In 1852 the Canadian institute began publishing its Proceedings under
the name of "The Canadian journal" in quarto. In this form it issued
forty-one numbers, making three volumes.

In 1856, with the same name, the form was changed to octavo, in which
size, up to 1878, ninety-two numbers were issued, making fifteen volumes.

In 1879 the name was changed to "Proceedings of the Canadian insti-
tute," under which title twenty numbers were issued, in seven volumes.

In 1890 the publication was enlarged, and the name again changed to
"Transactions of the Canadian institute."

In 1897 it was decided to issue two sets of publications, the "Proceed-
ings" to contain short papers and abstracts of longer papers; the "Trans-
actions" to be issued at longer intervals and to contain the
more extended papers. - cf. Proceedings of the institute.

The pagination is continuous in v. 1-8, 9-12, 13-15, 16-17, 21-25, 29-30, 34-35. Vols. 1-46 were issued in numbers (nos. 1-497, March 6, 1665; Dec. 1750); from 1751-62 only a half volume was issued annually; from 1763-1895 a complete volume, consisting of two or more parts in most cases, was published each year; since 1896 one or more volumes have been issued annually. From 1897 the transactions have been divided into two series: Series A, containing papers of a mathematical or physical character; Series B, containing papers of a biological character; (these subtitles are not used on the title-pages of the volumes, however, until 1896, though the designation of the parts by letters A and B begins in 1887). Vols. 62-142, 1792-1852 have no volume numbers; v. 1-190A bear dates in the body of the title (except v. 62, 63, and 64, pt. 1); v. 190m - have imprint date only. The octavo series of Abstracts first published in 1832 forms a sequence
to the quarto Abridgements of the Philosophical transactions which
covered the period 1665-1800. The first two volumes, 1800-30, contain a
collection of abstracts of papers arranged in the order of the full papers in
the Philosophical transactions; in the third volume a new order was
adopted, the abstracts being arranged under meetings, each meeting being
headed by a brief account of the business which preceded the reading of
the papers; v. 3-6 were issued in numbers (no. 1-102) each having the
caption "Proceedings." Beginning with v. 7, 1854/55, many papers were
published in full in the Proceedings which were not included in the Philo-
sophical transactions, and from that date the title "Proceedings" is used

on the t.p. of the volumes as well as on the numbers; the numbering of
the parts, begun anew with v. 7, has continued in an unbroken series to the
present (no. 1-) In 1905 (v. 70) the Proceedings were enlarged to
imperial octavo and were divided into two series, "Series A, containing
papers of a mathematical and physical character," "Series B, containing
papers of a biological character," corresponding to the two divisions in
the Philosophical transactions; which have been published since 1887.
Obituary notices of deceased fellows were included in v. 7-64; v. 75 is
made up of "obituary notices of deceased fellows, chiefly for the period 1808-
1904, with a general index to previous obituary notices; the notices have
